EUROFIDAI FORWARD EXCHANGE RATES DAILY DATABASE	11
CURRENCY CODES.....	12

Read me - October 2017

The EUROFIDAI spot exchange rate database was updated **until December 2016**.

Our **selection** contains **4473 spot quotations** and **9 836 638 observations**.

Our **complete** database contains **15 371 quotations** and **20 106 837 observations**.

New variables :

We included new variables like the **MID, BID** and **ASK** for the closing, opening, highest and lowest spot exchange rates, as well as **settlement exchange rate**.

Reminder : NEW OPTION FOR SIMPLIFIED RESULTS

For the EUROFIDAI spot exchange rates database, a new option is available.

This option offers you only one code, selected by EUROFIDAI.

It is available under the tab “Codes research”, in the “Result selection” section, by clicking on “Selected EUROFIDAI codes (NEW)”.

For example, if you would like the code of the quotation “number of USD per Euro”¹, instead of listing all codes and/or quotations from different contributors (suppliers or places), this option gives a simplified result, providing one single code selected by EUROFIDAI and one single quotation (per day and per exchange rate type).

For specific research on exchange rates, and if you need quotations listed by different suppliers or places, you need to use the other option displaying all the EUROFIDAI codes.

Please note :

*The publication of the **forward exchange rates database was interrupted**, due to new regulations of our contributors of raw data (suppliers and/or places), limiting the data to the end of 2011. **The database is still available upon demand.***

¹ See table 1 for the explanations of currency codes.

EUROFIDAI SPOT EXCHANGE RATES

DAILY DATABASE

1. Procedures for users

To get a spot exchange rate, it is necessary to obtain the associated EUROFIDAI code to extract data. Using the “Codes Research” tab, you can find the EUROFIDAI code in several ways:

- via the currency name or a list of currency names
- via an ISIN code or a list of ISIN codes (if you already know the code)
- by downloading the code list (see below)

Research Criteria

Code or Name [Click here for Code list](#)

<input type="radio"/> Currency Name	<input type="text"/>
<input type="radio"/> List of Currency Names (submit a file)	<input type="button" value="Browse..."/> No file selected.
<input type="radio"/> Isin Codes	<input type="text"/>
<input type="radio"/> List of Isin Codes (submit a file)	<input type="button" value="Browse..."/> No file selected.
<input type="radio"/> EUROFIDAI Codes	<input type="text"/>
<input type="radio"/> List of EUROFIDAI Codes (submit a file)	<input type="button" value="Browse..."/> No file selected.

When downloading the results of a code research, choose “only codes” to obtain a list of codes for the data extraction, and “codes and other information” if you’d like to view details about each instrument and select codes based on these details.

The period and the number of observations vary with the base currency and the counter currency (see code list).

Result Selection

- Selected EUROFIDAI Codes
- All EUROFIDAI Codes

2. Option “SELECTED EUROFIDAI CODES”

The aforementioned option “Selected EUROFIDAI Codes” gives you a simplified result, providing only one single quotation per day and per exchange rate.

For example, if you want the code of the quotation “number of U.S dollars per Euro”, instead of listing all codes and / or quotations from different contributors (suppliers or places), this option provides one single code selected by EUROFIDAI. This data can be used for simple conversions, for instance dividends or returns.

For specific research on exchange rates, and if you need quotations listed by different suppliers or places, you need to use the other option displaying all the EUROFIDAI codes.

3. Option “ALL EUROFIDAI CODES”

The EUROFIDAI database of daily spot exchange rates consists of 15 371 quotations and 20 106 837 observations. Available currencies are quoted against the main currencies (euro, U.S. dollar, Swiss franc, pound sterling and before Euro, French franc and deutsche mark). For example, on July 01, 2013, the value of the U.S. dollar is quoted as 1.3043 U.S. dollar per Euro. In other words, one Euro was exchanged in the foreign exchange market for 1.3043 U.S. dollar. Conversely, the value of the Euro is given by the reciprocal of 1.3043, which is 0.7667 Euro. EUROFIDAI provides these two types of exchange rates when we have the two quotations.

Missing exchange rates can be built by easy calculations. For example, the number of Swedish krona per Japanese yen can be obtained by multiplying the number of Swedish krona per U.S. dollar by the number of U.S. dollars per Japanese yen.

4. Database Structure

The various data types, available in the EUROFIDAI spot exchange rates database, are summarized in the following table.

Table 1: Data Types Recorded in the Spot Exchange Rates Database

Variable (English name) <i>(French version)</i>	Description
EUROFIDAI_CODE <i>(CODE_EUROFIDAI)</i>	EUROFIDAI code of the exchange rate
BEGDATE_EUROFIDAI_CODE <i>(DEBDISPO_CODE_EUROFIDAI)</i>	Date of first available data for the EUROFIDAI code
FIX_AMOUNT_OF_BASE_CURRENCY <i>(MONTANT_FIXE_MONNAIE_REFERENCE)</i>	The amount of base currency
ENDDATE_EUROFIDAI_CODE <i>(FINDISPO_CODE_EUROFIDAI)</i>	Date of last available data for the EUROFIDAI code
ISIN_CODE <i>(CODE_ISIN)</i>	ISIN code of the exchange rate
ISIN_CODE_STATUS <i>(STATUT_CODE_ISIN)</i>	Code for the status of the ISIN code
ISIN_CODE_STATUS_NAME <i>(LIBELLE_STATUT_CODE_ISIN)</i>	Explicit designation for the status of the ISIN code (1 for “Reserved”, 2 for “Active”, 3 for “Deleted”, 4 for “Reactivated” or 5 for “Change pending”)
BEGDATEAV_ISIN_CODE <i>(DEB_CODE_ISIN)</i>	First date at which the ISIN code is valid
ENDDATEAV_ISIN_CODE <i>(FIN_CODE_ISIN)</i>	Last date at which the ISIN code is valid
VALOREN_CODE <i>(CODE_VALOREN)</i>	VALOREN code of the exchange rate
VALOREN_CODE_EXPIRATION_DATE <i>(DATE_EXPIRATION_CODE_VALOREN)</i>	Date at which the VALOREN code expired
VALOREN_CODE_EXPIRATION_REASON <i>(RAISON_EXPIRATION_CODE_VALOREN)</i>	Reason for which the VALOREN code expired

Variable (English name) (French version)	Description
VALOREN_CODE_EXPIRATION_REASON_NAME (LIBELLE_RAISON_EXPIRATION_CODE_VALOREN)	Explicit explanation of the reason for which the VALOREN code expired
EXCHANGE_RATE_NAME (NOM_COURS_CHANGE)	Name of the exchange rate (the exchange rate name is to read as follows: the first currency code is the base currency code and the second one is the counter currency code. For instance, if the code 814 for the Euro is followed by the code 333 for the USD, the quotation will provide the number of U.S dollars per euro)
NUMBER_OBSERVATIONS (NB_OBSERVATIONS)	Number of observations for the exchange rate
BASE_CURRENCY (MONNAIE_REFERENCE)	Code for the base currency (see below for explanations)
BASE_CURRENCY_NAME (NOM_MONNAIE_REFERENCE)	Name of the base currency (see below for explanations)
COUNTER_CURRENCY (DEVISE)	Code for the counter currency (see below for explanations)
COUNTER_CURRENCY_NAME (NOM_DEVISE)	Name of the counter currency (see below for explanations)
STATUS (STATUT)	Code for the exchange rate status
STATUS_NAME (LIBELLE_STATUT)	Explicit designation for the exchange rate status (for example, "active" or "inactive")
SOURCE (SOURCE)	Code of the information source
SOURCE_NAME (NOM_SOURCE)	Name of the information source
SOURCE_TYPE (TYPE_SOURCE)	Explicit designation for the type of the source
SOURCE_COUNTRY_NAME (NOM_PAYS_SOURCE)	Name of the country's information source
OPENING_MID_EXCHANGE_RATE (COURS_OUVERTURE_MID)	Opening Mid exchange rate
OPENING_BID_EXCHANGE_RATE (COURS_OUVERTURE_BID)	Opening BID exchange rate

Variable (English name) <i>(French version)</i>	Description
OPENING_ASK_EXCHANGE_RATE <i>(COURS_OUVERTURE_ASK)</i>	Opening ASK exchange rate
CLOSING_MID_EXCHANGE_RATE <i>(COURS_CLOTURE_MID)</i>	Closing Mid exchange rate
CLOSING_BID_EXCHANGE_RATE <i>(COURS_CLOTURE_BID)</i>	Closing BID exchange rate
CLOSING_ASK_EXCHANGE_RATE <i>(COURS_CLOTURE_ASK)</i>	Closing ASK exchange rate
LOWEST_MID_EXCHANGE_RATE <i>(COURS_PLUS_BAS_MID)</i>	Lowest MID exchange rate
LOWEST_BID_EXCHANGE_RATE <i>(COURS_PLUS_BAS_BID)</i>	Lowest BID exchange rate
LOWEST_ASK_EXCHANGE_RATE <i>(COURS_PLUS_BAS_ASK)</i>	Lowest ASK exchange rate
HIGHEST_MID_EXCHANGE_RATE <i>(COURS_PLUS_HAUT_MID)</i>	Highest MID exchange rate
HIGHEST_BID_EXCHANGE_RATE <i>(COURS_PLUS_HAUT_BID)</i>	Highest BID exchange rate
HIGHEST_ASK_EXCHANGE_RATE <i>(COURS_PLUS_HAUT_ASK)</i>	Highest ASK exchange rate
ADJUSTED_EXCHANGE_RATE <i>(COURS_AJUSTE)</i>	Adjusted exchange rate
ESTIMATED_EXCHANGE_RATE <i>(COURS_ESTIME)</i>	Exchange rate which, according to the various situations, can be defined in a different way
ESTIMATED_EXCHANGE_RATE_INDIC <i>(INDIC_COURS_ESTIME)</i>	Code associated with the choice made for the estimated exchange rate
ESTIMATED_EXCHANGE_RATE_INDIC_NAME <i>(LIBELLE_INDIC_COURS_ESTIME)</i>	Explicit explanation of the choice made for the estimated exchange rate
SETTLEMENT_EXCHANGE_RATE <i>(COURS_REGLEMENT)</i>	Settlement Exchange Rate
ADJUST_COEF <i>(COEF_AJUST)</i>	Adjustment coefficient
QUOTATION_DATE <i>(DATE_COTATION)</i>	Trading date

EUROFIDAI CODE (EUROFIDAI_CODE)

This is the unique identification code attributed by EUROFIDAI to each exchange rate. The EUROFIDAI code has a specific structure: for exchange rates, the EUROFIDAI code is in the range from 500,000,000,000,000 to 599,999,999,999,999.

Example of a spot exchange rate code:

The EUROFIDAI code for the quotation EUR/USD is 500081433310152.

The first number of the EUROFIDAI code for exchange rates is 5.

000 means that the maturity is 0 meaning it is a spot exchange rate.

814 and 333 are two keys representing the euro (the base currency here) and the U.S. dollar (the counter currency here) respectively. The quotation will provide the number of U.S. dollars per Euro.

The last five numbers identify the considered foreign exchange market or the contributor. For instance, 10 152 is the identification number of the Chicago Mercantile Exchange (C.M.E.).

If the 5 last numbers are 60001, this means that we merged several different suppliers and identify EUROFIDAI as a contributor.

You can download a csv file containing **EUROFIDAI codes and additional information (other codes, name, observation period...)** on the **EUROFIDAI web site (under Daily Market Data > Exchange rates > Spot exchange rates)**.

BASE CURRENCY (BASE_CURRENCY)

The base currency corresponds to the reference currency in a currency pair quoted on the foreign exchange market (Forex). For example, if the U.S. dollar is the base currency, the quotation will provide the number of another currency (counter currency) per U.S. dollar. "The amount of the base currency is mainly equal to one; but sometimes, it can be equal to another value. For instance, if you consider the Japanese Yen (JPY) as the base currency, the fixed amount is equal to 100. The fixed amount of the base currency will be given in the "Fixed amount of base currency" each time you will download exchange rates"

COUNTER CURRENCY (COUNTER_CURRENCY)

The counter currency corresponds to the currency you want to have the quotation for per a base currency. If the base currency is the Euro and the counter currency is the U.S. dollar

(USD), the quotation will provide the number of USD per Euro. The counter currency is sometimes called quote currency.

ADJUSTMENT COEFFICIENT (ADJUST_COEFF)

If the considered currency has been devaluated or the currency is changed by the political authorities, the coefficient adjustment is different from 1. For example, the value of one Venezuelan bolivar has been divided by 1000 on January 2, 2008; the new bolivar is equal to 0.001 old bolivar and the adjustment coefficient is 0.001.

EUROFIDAI FORWARD EXCHANGE RATES

DAILY DATABASE

The publications of the **forward exchange rates database was interrupted**, due to new regulations of our contributors of raw data (suppliers and/or places). The database, covering a period from X to 2011, is still available upon demand.

EUROFIDAI is a public academic institute funded by the CNRS,
which benefits from Intramural Service Unit (UPS 3390) status.

The National Center for Scientific Research (CNRS) is a public organization under the responsibility of the French Ministry of Higher Education and Research.

As a pluridisciplinary institution, it covers all scientific disciplines, including the humanities and social sciences, biological sciences, nuclear and particle physics, information sciences, engineering and systems, physics, mathematical sciences, chemistry, earth sciences and astronomy, ecology and the environment.

As an interdisciplinary body, it promotes interaction between disciplines.

With 34.000 researchers, engineers and technicians, CNRS is organized around 10 thematic institutes which orchestrate its scientific policy, while its 19 divisions represent it in the French regions.

CNRS has a budget of approximately €3.3 billion. Its 1.053 research units, including 95% in partnership with universities, higher education institutions and other research organizations, are present throughout France.
